# CONGRESSIONAL INFORMATION SOURCES INVENTORIES AND DIRECTORIES (CISID) DATA BASE

## Magnetic Tapes Available

Developed and maintained by the General Accounting Office (GAO) under Title VIII of the Congressional Budget and Impoundment Control Act of 1974 (P.L. 93-344), the CISID data base consists of the following four files on computer tapes:

1. **Inventory of Federal Evaluations—(E-File).** This file consists of an inventory of approximately 8,780 program and management evaluation reports produced by and for the departments and agencies of the Federal government.
2. **Inventory of Requirements for Reports to the Congress—(R-File).** This file describes approximately 3,250 requirements for recurring and one time reports to the Congress from the executive, legislative, and judicial branches of the Federal government and from independent agencies and the federally chartered corporations.
3. **Inventory of Information Sources/Resources—(I-File).** This file contains an inventory of approximately 950 information sources (documents) and resources (facilities) issued or maintained by Federal agencies.
4. **Inventory of Federal Information Systems—(S-File).** This file describes approximately 1,660 systems maintained by Federal agencies, which contain fiscal, budgetary, and program-related information.

The information for these inventories is collected annually through the use of four especially designed forms filled in and submitted by Federal agencies and federally chartered corporations. Entries in the CISID data base provide the user with a full range of information, including title or name, agency maintaining the system or facility or issuing the document, authorizing legislation, congressional committees of relevance, budget and program information, agency contacts, standard bibliographic information, and descriptive abstracts.

All of the CISID files are available on magnetic tapes. Selected data fields from the CISID data base are currently available on-line via the Library of Congress' SCORPIO information retrieval system. The records are standard IBM fixed blocked records written in EBCDIC. The tapes are normally 9-track written at 1600 BPI density. GAO is unable to furnish any supporting software.

Inquiries regarding the availability of CISID tapes should be addressed to:
